## About Me

A self-taught dedicated developer and programmer looking for a position in the industry as a **Web Developer** either in the front-end, back-end or both, In order to utilize and hone my skills to good use by creating innovative and dynamic web applications and to contribute for the organization and its clients a wonderful user experience.

## Experience

**Metro Antipolo Hospital & Medical Center Inc.**

**Medical Technologist**   March 2022 - August 2022

- Performed professional laboratory works following established clinical procedures on patient specimens for medical diagnosis.
- Performed daily quality assurance tests and calibrations on machines in different sections of the laboratory to maintain constant and accurate results.
- Experience in daily patient communication and management.
- Cooperation with other hospital healthcare employees to ensure proper management of patients.

## Education

*Centro Escolar University Manila*

June 2015 - June 2021

**Bachelor of Science in Medical Technology**

## Skills

HTML5, CSS3, SASS/SCSS, JavaScript, Git & Github, PHP

## Projects:

**Sneakers e-commerce product page**

↗ Preview site | Code repo

A single e-commerce product page that uses lightbox features and a functional add to cart layout with device responsiveness in mind. It is built using HTML, CSS and vanilla JavaScript. This is a solution to the e-commerce product page challenge on frontendmentor.

**Personal Portfolio Website**

↗ Preview site | Code repo

My own personal website built with HTML, Sass/Scss, & JavaScript. It has a modern design and animations and is responsive for all devices.
